SZÉLESSÉG

FELHASZNÁLÁS:

Edging is used to separate lawn areas from paths, to beautify gardens and green spaces, and to protect areas with plants. It can be laid in various shapes, thanks to the possibility of circular laying and attachment to other edgings through connectors.

MINŐSÉGI FELTÉTELEK:

- Manufacturer's declaration

ELŐNYÖK:

- Easy installation, no trenching and/or foundation preparation required.
- Flexible material allows installation on both straight and curved lines
- It is recommended that the curb be anchored.
- Universal anchors can be used, made of plastic or galvanized steel
- Easy attachment to other curbs via connector.

TERMÉKGARANCIA:

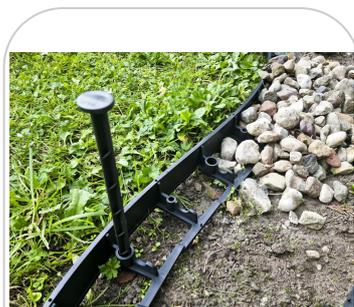

- 24 months, subject to compliance with assembly instructions

SZERELÉS

Installation is done using anchors. For good fixation, we recommend installing at least 2 anchors/meter.

! Installation recommendations:

- The ground must be smooth and accessible to insert the anchors
- In the case of stony ground, it is recommended to use galvanized steel anchors.
- When curving the curb, additional anchors are recommended.
- The perforated part of the curb must be at the base, placed on the ground, forming an angle of 90C.
