FELHASZNÁLÁS:

The purpose of mulching foil is to protect plant roots from low temperatures, minimize water evaporation from the soil, and protect fruits or vegetables from dirt, insects, or harmful weeds.

It is used to protect fruit crops, create hedges, paths, flower beds, or plant trees along driveways.

MINŐSÉGI FELTÉTELEK:

- Declaration of conformity

ELŐNYÖK:

- Preventing weed growth;
- UV stabilization;
- Retaining soil moisture;
- High elasticity - resistance;
- Ensures faster plant growth;
- Helps fight pests;
- Reduces water evaporation;
- Preserving soil structure;

TERMÉKGARANCIA:

- 24-month warranty, subject to compliance with the assembly, storage and operation instructions.
- It is recommended that the product be used for a single season, for high efficiency and soil protection.

SZERELÉS

The mulching film is applied manually, it is spread out on the prepared soil, it is cut in the shape of a cross in the place where the seedlings will be planted, and the edges of the film are covered with soil. The film can also be applied mechanically, in which case special application equipment will be used.
