SZERELÉS

The BASE gutter drainage system can be installed without a manhole because both ends of the gutter can be closed with simple end pieces or with an outlet, and the discharge point to the sewer network will be made through the vertical connection of the gutter or through the end plate with outlet.
We recommend that in projects exceeding 20 linear meters, a manhole be installed every 20m for inspection and cleaning of the gutter line and minimizing the risk of clogging.

! For efficient installation, we recommend using G12M29-C sealant.
It is used for sealing gutters, pipes and drainage systems.
- Curing time: 24h/2-3 mm
- Operating temperature: +5° C to +40° C
- Maximum storage temperature: 32° C
