SZERELÉS

The channels drainage system can be installed without a collector chimney because both ends of the gutter can be closed with end pieces, and the discharge point to the sewer network will be made through the vertical connection of the gutterchannel. For the correct operation and durability of the system, it is recommended to strictly follow the installation instructions provided by the manufacturer, as well as to have the installation work carried out by qualified and authorized personnel. Correct installation guarantees the optimal performance of the drainage system and prevents any problems arising during operation.

- !** For efficient installation, we recommend using G12M29-C sealant. It is used for sealing gutters, pipes and drainage systems.
- Curing time: 24h/2-3 mm
 - Operating temperature: -10° C to +40° C
 - Storage conditions: Store in a ventilated area, at low temperatures.
- BASE sealant, construction products, 310 ml tube (G12M29-C).
