SZÉLESSÉG

FELHASZNÁLÁS:

Polypropylene edging is used to separate lawn areas from paths, in landscaping, to beautify gardens and green spaces and to protect areas with vegetation. It can be laid in various shapes, thanks to the areas that can be cut and which allow the edging to be bent.

MINŐSÉGI FELTÉTELEK:

- Manufacturer's declaration

ELŐNYÖK:

- Easy installation, no trenching and/or foundation preparation required.
- Flexible material allows installation on both straight and curved lines
- It is recommended that the edging be anchored.
- Universal anchors, made of plastic or galvanized steel, can be used
- The edging is easy to cut.

TERMÉKGARANCIA:

- 24 months, subject to compliance with assembly instructions

SZERELÉS

We recommend using Polypropylene or Galvanized Steel anchors to secure the separating borders.
