- Various installation widths and heights
- Use in residential areas or private homes
- Long service life

ÉLETTARTAM:

- 20 years - subject to compliance with assembly, storage and operation instructions

SZERELÉS

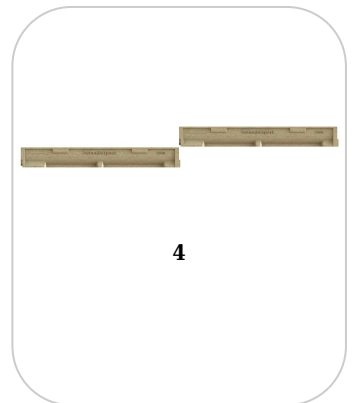

The BASE gutter drainage system can be installed without a collector chamber because both ends of the gutter can be closed with end pieces, and the discharge point to the sewer network will be through the gutter with the vertical connection. Otherwise, and in the case of gutter lines over 10m long, we recommend using a drain chamber to collect alluvium and ensure the proper functioning of the system.

! For efficient installation, we recommend using G12M29-C sealant. It is used for sealing gutters, pipes and drainage systems.

- Curing time: 24h/2-3 mm
- Operating temperature: -10° C to +40° C
- Storage conditions: Store in a ventilated area, at low temperatures.

- BASE sealant, construction products, 310 ml tube (G12M29-C).
