SZERELÉS

We recommend that the PRO gutter drainage system be installed next to a manhole, every 20 linear meters of gutter, or, if the installation of a manhole is not possible, gutters with vertical discharge can be used. The system is closed with end plates on both sides.

For efficient installation, we recommend using G12M29C sealant.

It is used for sealing gutters, pipes and drainage systems (interior or exterior), for bonding connections or joints.

- Curing time: 24h/2-3 mm

- Operating temperature: -10° C to +40° C

- Storage conditions: Store in a ventilated area at low temperatures.
