### FELHASZNÁLÁS:

BASE C250 drainage channels are intended for rainwater drainage and are used in public areas, parking lots and on roadsides, next to sidewalk curbs and in non-traffic areas.

### MINŐSÉGI FELTÉTELEK:

- According to SR EN 1433:2002
- In accordance with EU Regulation No. 305/2011
- Declaration of performance

### ELŐNYÖK:

- Easy to handle and install
- UV-resistant
- Various widths and installation heights
- Suitable for public areas
- Long lifespan

### TERMÉKGARANCIA:

- 20 years - if installation, storage, and operation instructions are followed.

## SZERELÉS

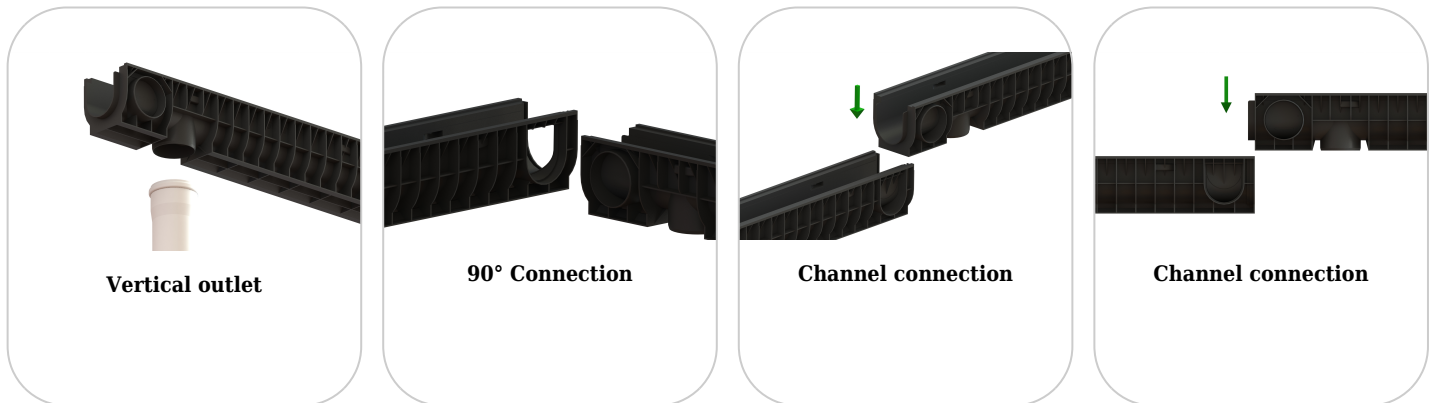

The channels drainage system can be installed without a collector chimney because both ends of the gutter can be closed with end pieces, and the discharge point to the sewer network will be made through the vertical connection of the gutterchannel. For the correct operation and durability of the system, it is recommended to strictly follow the installation instructions provided by the manufacturer, as well as to have the installation work carried out by qualified and authorized personnel. Correct installation guarantees the optimal performance of the drainage system and prevents any problems arising during operation.

**!** For an efficient installation, we recommend using the G12M29-C sealant. It is used for sealing trenches, pipes, and drainage systems.

- Cure time: 24 hours for 2-3 mm thickness
- Application temperature: +5° C to +40° C
- Maximum storage temperature: 32° C

BASE sealant, construction products, 310 ml tube (G12M29-C).
