INSTALLATION

We recommend that the PRO gutter drainage system be installed next to a manhole, every 20 linear meters of gutter, or, if the installation of a manhole is not possible, gutters with vertical discharge can be used. The system is closed with end plates on both sides.

! For efficient installation, we recommend using G12M29C sealant.
It is used for sealing gutters, pipes and drainage systems (interior or exterior), for bonding connections or joints.
- Curing time: 24h/2-3 mm
- Operating temperature: -10° C to +40° C
- Storage conditions: Store in a ventilated area at low temperatures.
