### FELHASZNÁLÁS:

BASE C250 drainage channels are intended for rainwater drainage and are used in public areas, parking lots and on roadsides, next to sidewalk curbs and in non-traffic areas.

### MINŐSÉGI FELTÉTELEK:

- According to SR EN 1433:2003
- In accordance with EU Regulation No. 305/2011
- Declaration of performance

### ELŐNYÖK:

- Easy to handle and install
- UV-resistant
- Various widths and installation heights
- Suitable for public areas
- Long lifespan

### ÉLETTARTAM:

- 20 years - when installation, storage, and operation instructions are followed

## SZERELÉS

The BASE drainage system can be installed without the need for a collector chamber, as both ends of the channel can be closed with either simple end pieces or end pieces with drainage outlets.

Discharge to the sewage network can be done through the vertical connection of the channel or through the end plate with outlet.

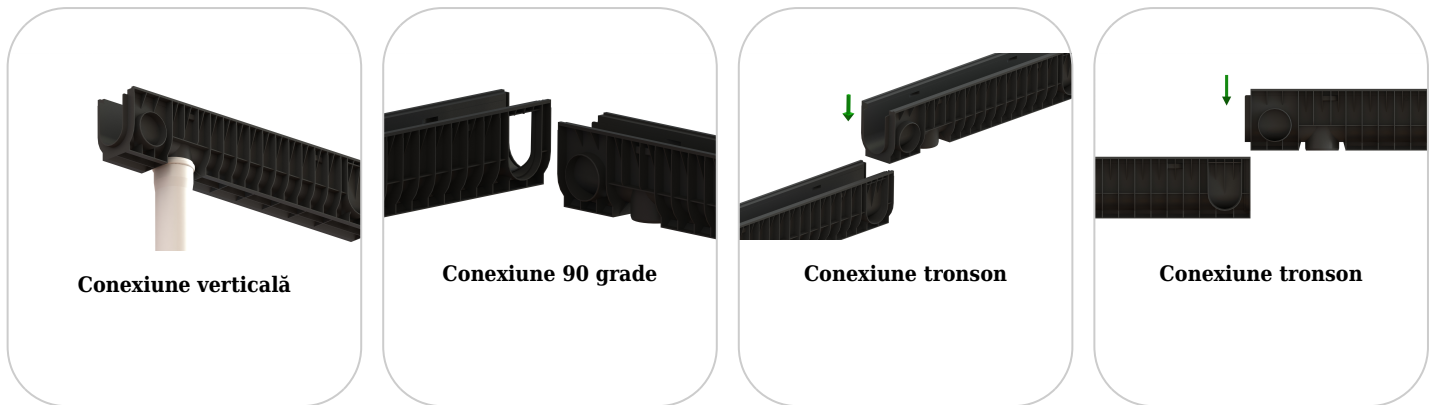

For projects exceeding 20 linear meters, we recommend installing a collector chamber every 20 meters to facilitate the inspection and cleaning of the channel line, thereby reducing the risk of clogging.

**!** For efficient installation, we recommend using the G12M29-C sealant.

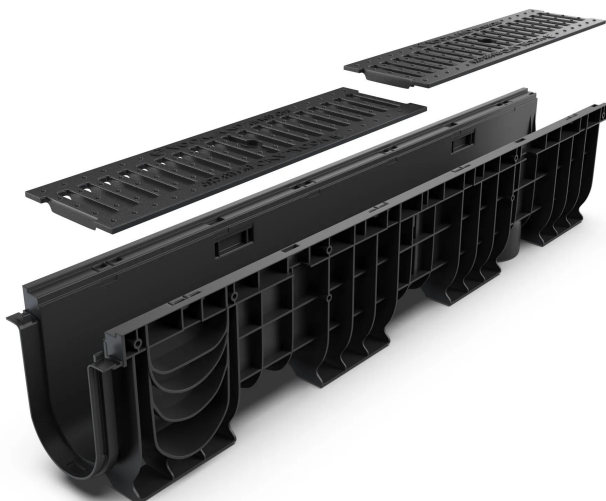

It is used for sealing channels, pipes, and drainage systems.

- Curing time: 24h/2-3 mm
- Application temperature: +5° C to +40° C
- Maximum storage temperature: 32° C

BASE sealant, construction products, 310 ml tube (G12M29-C).
